

## In the Claims

1-22. (Cancelled)

23. (Currently Amended) A method for providing restricted security distribution instructions to a transfer agent comprising the steps of:

receiving distribution information from a Venture Capitalist ("VC") in electronic form, the distribution information including data indicating for each participant in the distribution a name, an identification number, and a number of allocated securities;

importing the distribution information into a database system;

matching participants identified in the distribution information to participant information previously entered in the database system;

associating each respective participant in the distribution information with a contact from which instructions regarding ~~the~~ a disposition of the allocated securities to ~~the~~ each respective participant can be obtained;

indicating contacts who must be contacted to obtain distribution instructions for associated participants;

storing distribution instructions received from contacts in the database system;

generating a report ~~containing~~ including received distribution instructions for the participants in the distribution; and

providing the report to a transfer agent.

1           24. **(Original)** The method of claim 23, further comprising the step of  
2 scrubbing the received information prior to the importing step.

3  
4           25. **(Original)** The method of claim 23, wherein the step of matching  
5 participants comprises the steps of:  
6           identifying previously stored records in the database system containing  
7 matching identification numbers;  
8           indicating differences between data in identified records and the  
9 distribution data received from the VC; and  
10          indicating participants in the distribution for which no matching previously  
11 stored record was found.

12  
13          26. **(Original)** The method of claim 23, further comprising the step of  
14 defining distribution restrictions for a particular participant.

15  
16          27. **(Original)** The method of claim 23, wherein the step of indicating  
17 comprises the step of dynamically indicating the contacts for participants in the  
18 distribution and a contact status for the indicated contacts.

19  
20          28. **(Original)** The method of claim 23, further comprising the step of  
21 upon the selection of an indicated contact indicating all open items for which the  
22 contact must be contacted.

23  
24          29. **(Original)** The method of claim 23, wherein the step of generating is  
25

1 performed on a periodic basis.

2  
3 30. **(Original)** The method of claim 23, wherein the step of generating is  
4 performed on demand.

5  
6 31. **(Original)** The method of claim 23, wherein the step of generating is  
7 performed in response to the receipt of distribution instructions for at least one  
8 participant.

9  
10 32. **(Currently Amended)** The method of claim 23, ~~wherein the report is~~  
11 ~~incremental~~ further comprising:

12 granting the transfer agent custody of the allocated securities for at least a  
13 limited period of time, wherein the allocated securities are associated with  
14 corresponding participants, and further wherein the transfer agent is configured to  
15 perform incremental distributions of the securities in accordance with the  
16 distribution instructions.

17  
18 33. **(Currently Amended)** The method of claim 23, wherein the ~~report is~~  
19 ~~provided to the transfer agent in electronic form~~ indicating further comprises  
20 sorting contacts in an order of urgency, such that contacts associated with more  
21 exigent items are contacted before contacts associated with less exigent items.

22  
23 34. **(Original)** A system for generating restricted security distribution  
24 instruction reports suitable for use by a transfer agent, the system comprising:  
25

1 a database;  
2 at least one client computer system having access to the database;  
3 a database import module configured to import into the database  
4 distribution information received from an originating entity in electronic form, the  
5 distribution information including data indicating for respective participants in the  
6 distribution a name, an identification number, and a number of allocated  
7 securities;  
8 a participant matching module configured to match participants identified  
9 in the distribution information to participant information previously stored in the  
10 database;  
11 a participant contact association module configured to associate each  
12 participant in the distribution with a contact from which instructions regarding the  
13 disposition of the securities allocated to the participant can be obtained;  
14 a call queue module configured to indicate contacts who must be contacted  
15 to obtain distribution instructions for associated participants;  
16 at least one disposition module configured to store distribution instructions  
17 received from the contacts; and  
18 a participant instruction report module configured to generate a report  
19 containing received instructions for the participants, the report suitable for  
20 electronic transfer to the transfer agent.

21  
22 35. **(Original)** The system of claim 34, further comprising a scrubbing  
23 module configured to format the received information and to verify that required  
24 data fields are present prior to processing of the received information by the  
25

1 import module.

2  
3 36. **(Original)** The system of claim 34, wherein the participant matching  
4 module is configured to:

5 identify previously stored records in the database containing matching  
6 identification numbers;

7 indicate differences between data in identified records and the distribution  
8 data received from the originating entity; and

9 indicate participants in the distribution for which no matching previously  
10 stored record was found.

11  
12 37. **(Original)** The system of claim 34, wherein the call queue module is  
13 configured to dynamically indicate contacts for participants in the distribution and  
14 a contact status for the indicated contacts.

15  
16 38. **(Original)** The system of claim 34, further comprising a contact detail  
17 module configured to, upon the selection of an indicated contact, indicate all open  
18 items for which the selected contact must be contacted.

19  
20 39. **(Original)** The system of claim 34, wherein the participant instruction  
21 report module is configured to generate the report on a periodic basis.

22  
23 40. **(Original)** The system of claim 34, wherein the participant instruction  
24 report module is configured to generate a report on demand.

1  
2           41. **(Original)** The system of claim 34, wherein the participant instruction  
3 report module is configured to generate a report in response to the receipt of  
4 instructions for at least one participant.  
5

6           42. **(Original)** The system of claim 34, wherein the participant instruction  
7 report module configured to generate incremental reports.  
8

9           43. **(Original)** The system of claim 34, wherein the database comprises a  
10 plurality of tables including tables forming:

11           an allotment cluster configured to store information related to distribution  
12 tasks to be performed by the facilitator;

13           a participant cluster configured to store individual account level reference  
14 information;

15           a content cluster configured to store contact reference information; and

16           a project cluster configured to store information related to specific security  
17 distribution projects.  
18  
19  
20  
21  
22  
23  
24  
25
